Professional Summary

Full-stack developer skilled in Next.js, React, and Node.js, with internship experience in ReactJS development and performance optimization. Built multiple full-stack platforms integrating payments, AI APIs, and role-based access control.

Education

Indian Institute of Information Technology Ranchi

2023 – 2027

– B.Tech in Electronics and Communication Engineering

CGPA: 8.61

Experience

ReactJS Developer Intern – SiteCountry

Nov 2025 – Jan 2026

- Developed high-quality, reusable UI components using **ReactJS**, ensuring cross-browser compatibility and mobile responsiveness.
- Collaborated with back-end teams for **API integration** and conducted code reviews to improve maintainability.
- Optimized application performance using **Chrome DevTools** profiling, implementing lazy loading and caching strategies to reduce page load time from **4s to 2.5s**.

Projects

EduTrack – Learning Management System (LMS)

2025

Live: edu-track-pied.vercel.app Code: github.com/dubeypranaviit/edu-track

- Built a full-stack LMS with **3-role RBAC** (Student / Instructor / Admin), with authentication enforced at middleware and **authorization enforced at the API layer** via `requireRole()`.
- Integrated Stripe payment with **webhook signature verification** and idempotent enrollment using a **compound unique index** {user, course}.
- Built quiz engine with **negative marking**, server-side attempt limits, and detailed result review with correct/wrong/skipped breakdown.
- **Tech:** Next.js 15 (App Router), TypeScript, MongoDB, Clerk, Stripe, Cloudinary, Zustand, Tailwind CSS

EcoRevive – AI-Powered Waste Management Platform

2025

Live:.ecorevive-wm.vercel.app Code: github.com/dubeypranaviit/eco

- Built an AI-driven waste management platform enabling reporting, reward allocation, and report lifecycle tracking workflows.
- Integrated **Google Gemini API** to classify uploaded images into waste categories and extract structured data.
- Designed an event participation system for community cleanup events with **compound indexing with uniqueness constraints** to prevent duplicate joins.
- **Tech:** Next.js, Node.js, MongoDB, Clerk, Razorpay, Gemini API

NextFlow – Visual AI Workflow Automation Platform

2026

Live: nextflow-new.vercel.app Code: github.com/dubeypranaviit/NextFlow

- Built a visual AI workflow automation platform using React Flow and Next.js, enabling drag-and-drop AI pipelines.
- Implemented **DAG-based workflow execution** with topological sorting and Trigger.dev for asynchronous and parallel task orchestration.
- Integrated Gemini Vision API and Groq LLMs for multimodal AI workflows, processing both text prompts and base64-encoded images.
- **Tech:** Next.js, TypeScript, React Flow, PostgreSQL, Prisma, Trigger.dev, Clerk, Gemini API, Groq API, Tailwind CSS

Technical Skills

- **Languages:** C, C++, JavaScript, TypeScript, SQL
- **Frontend:** React.js, Next.js (App Router), Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs, MongoDB, PostgreSQL
- **Authentication:** Clerk, JWT
- **Tools & Libraries:** Git, Postman, Chrome DevTools, Stripe, Razorpay, Cloudinary, Gemini API, Redis
- **Core CS:** Data Structures & Algorithms, DBMS, OOPs, High-Level Design
- **Familiar with:** Docker, AWS (EC2, S3, Lambda)

Achievements

- Ranked in the **top 5 percentile** in JEE Mains.
- Solved **450+ DSA problems** across LeetCode and GeeksforGeeks.
